

"How to MAKE MONEY in Trust Funds, Companies and Life Insurance"

Working in a job 9 to 5 for 30 years will not build you a wealth or make you a super rich.

♦ Building Wealth With A Trust:

Here is a secret to creating generational wealth.

This is how people like Elon Musk, Jeff Bezos, Mark Zuckerberg, Larry Ellison, Warren Buffett, Bill Gates, Steve Ballmer, Donald Trump and thousands other people are so rich.

Yes, Elon Musk and Jeff Bezos are both founders and CEOs of very successful companies.

But there are other secrets to them gaining and maintaining great wealth.

The best part is anyone can do this.

Even your broke ass with \$0 in the bank.

Step 1:

Open a trust. Anyone can do this.

Ask any wealthy person you know they will most likely say they have a trust.

Step 2:

Buy an asset to put in the trust.

Don't worry this isn't hard.

There's a secret to this also.

Most people will just buy a life insurance policy. They are accessible to almost anyone.

There are different terms for life insurance policies.

You can purchase a \$100k policy for around \$20 a month. Or an \$1,000,000 policy for around \$50 a month.

Now that you've purchased your asset, you put it in the trust. Any other asset you have with significant monetary value you can also put into the trust.

This can be a home, a business, a vehicle etc.

Lets just assume for right now all you have is a \$300k life insurance policy in the trust.

Remember all your paying for the life insurance policy is around \$50 a month.

Here's where Jeff Bezos and Elon Musk come in.

They both have net worths in the hundreds of billions.

But remember, they don't have all of that just sitting in a bank account. Most of it is tied to the stock of their respective companies Amazon and Tesla.

So what do they do? They borrow against it.

If they need money they just go to the bank, borrow the money they need, and use their stock as collateral.

That's what you're going to do with your trust. Because you have a life insurance policy valued at \$300k that you put in the trust you can now borrow against it and use the life insurance policy as collateral.

EXAMPLE:

Here's an example of what you can do next.

You can borrow \$100k against your trust and use it as a down payment to purchase a \$500,000 home.

You're probably thinking well now I'm \$600K in debt so how am I building wealth?

Keep following just a little longer this is where the trust is really going to work in your favour.

First, add your home to the trust. After adding your home to the trust the total value of the trust will now be \$800k.

Keep in mind you won't be able to borrow against that full \$800k because your house isn't paid off yet.

But you still have \$200k to borrow against from your life insurance policy.

This next and final step is what will make or break it.

However, even if this final step goes wrong you're still okay because a trust fund is always protected even in the event of something like a bankruptcy.

This is why we put our assets in the trust in the first place. So what do you do with the last \$200k you borrowed against your life insurance?

You're going to purchase a small business franchise.

Before you say \$200k is not enough to buy a franchise.

If you google buy a franchise, there will be dozens of websites that will show you hundreds of franchises that you can purchase for \$200k or less.

The best part about buying a small franchise is that most are successful and already bringing in millions of dollars in revenue. You of course also have

the option to look into the financials of the franchise to see if it will be the right business for you to purchase.

Once you've purchased the franchise and started collecting profits you can now start to quickly pay down the debts you owe.

You'll be able to do this in no time because remember these franchises are doing several million in revenue each year.

Now of course all businesses have expenses so let's say hypothetically your business is doing \$3m annually in revenue with \$1.5m in expenses.

Guess what?

That leaves you with 1.5m free and clear to pay off all debts. So now you've paid off your house and you've paid off the \$300k you borrowed for the down payment on the house and to buy your franchise.

That leaves you with \$700k liquid cash and a total net worth of \$1.5m with no debt whatsoever to your name.

Now all you do is sit back and continue to collect the money from your franchise, spend some, save some, invest some, and live your dream life.

Aside from the monthly payment on your life insurance you did all of this with essentially \$0 out of your own pocket.

Anyone can do this.

♦ **Building Wealth With An LLC or Ltd Company:**

Creating a LLC or Limited Company is a way you can build wealth by leveraging access to credit.

You don't even need to be a business owner to form an LLC.

Let's say, for example, you create content on social media and get paid to do so. In this case, you would fall into the self-employed category.

You would also be categorized as an independent contractor, which technically means you operate your own business.

So what you could do is create an LLC, open a business bank account, and deposit your social media earnings into that account.

Depending on how consistent and how high your earnings are, the bank you are using will probably want to start lending money to you.

You could use this money and pair it with your own to invest and start other businesses and continue to diversify your income and build wealth.

♦ **Stocks and Cryptocurrencies:**

Many also build wealth using stocks and cryptocurrencies.

With stocks and cryptocurrencies you can become very rich if you have a good strategy. The people that win big with stocks and crypto are the people that invest early.

The best way to do this with stocks specifically is to pay attention to IPOs.

An IPO stock refers to shares of stock from a company that are being offered to the public for the first time through an Initial Public Offering (IPO). The IPO process allows a private company to become a publicly traded company by selling its ownership shares to a wide range of investors on a stock exchange, thereby raising significant capital.

In short, the IPO Stock meaning a New and Fresh company's stock listed on market. This is when a company first goes public and their stock is officially able to be bought.

I'm sure you've heard of Tesla.

If you had invested \$10,000 in Tesla stock when it first went public you would be a multimillionaire today.

I'm sure you've also heard of bitcoin. If you had invested just \$1000 in bitcoin in 2010 you would now be a billionaire.

This is why investing early is very important. There are several websites that show companies that are about to go public.

If you want to invest early your best way is to do research on these companies before they go public and see which ones have the best chance to become successful.

You can search this information on Google or any search engine easily.

Once you decide what companies to invest in, buy their stock as soon as it goes public.

♦ **Final words:**

If you're a person that wonders how there's so many rich people in existence, hopefully now you're starting to understand that it could be you too.

You don't need a lot of money in the bank in order to become rich.

All you need to do is get creative and take action.

It's obvious that people can become wealthy in so many ways, and remember a lot of people are actually born into wealth.

When you're born into wealth it's obviously easier to continue building that wealth for generations.

A lot of the people you see with money inherited it, and it very well could be from things like life insurance that we were talking about earlier.

When people pass away they pass down their assets like their homes, their 401(k)s, trust funds etc.

The people who inherit that money will use it to their advantage and build wealth if they're smart.

Working a job 9 to 5 for 30 years is not what's going to build wealth. Even somebody with an extremely high salary, will need to put their money to work in order to create actual financial freedom.

If you were to see a Lamborghini driving down the street you're probably not asking yourself what college degree they have, or what school they went to.

You're probably wondering what business they run, or what unique and out of the ordinary thing they're doing to make so much money. You will most likely find out that the person either didn't go to college at all or dropped out of college.

I'm sure you get the point though.

In order to live a financially free life, you have to be willing to do something out of the ordinary.

Hopefully, now you're motivated to get up and start taking the steps necessary to achieve the financial freedom you're looking for.

I wish you the best of luck.

Thank you
